PROFESSIONAL SUMMARY

Software Engineer with 1+ year of professional experience designing and scaling high-concurrency backend services, distributed systems, and full-stack web platforms using **NestJS**, **Next.js 16 (React 19)**, **Go (Golang)**, and **TypeScript**. Proven track record architecting enterprise production platforms including **TaxiBy** (ride-hailing & fleet mobility), **ProductCRM** (internal CRM scaling to commercial SaaS with MCP AI Copilot), and distributed **Go microservices** with Kafka and gRPC. Experienced delivering end-to-end client applications across custom CMS portals, e-commerce applications, real-time analytics dashboards, and interactive web experiences.

TECHNICAL SKILLS

Programming Languages: TypeScript, JavaScript (ES6+), Go (Golang), SQL

Backend & Frameworks: NestJS, Node.js, Express.js, RESTful APIs, WebSockets (Socket.IO), gRPC

Frontend Technologies: Next.js 16 (App Router), React 19, Tailwind CSS, Zustand, Redux, TanStack Query, HTML5/CSS3

Distributed Systems & Queues: Microservices Architecture, Apache Kafka, RabbitMQ, BullMQ, Redis (Pub/Sub, Caching, H3), KrakenD Gateway

Databases & ORMs: PostgreSQL, MySQL, Prisma ORM

Cloud, Tools & Integrations: Docker, Docker Compose, AWS (EC2, S3), Razorpay, Cashfree Payouts, Interakt (WhatsApp API), Fast2SMS, IVR Integrations, Google Search Console (GSC), Model Context Protocol (MCP) / AI Copilot, Git, GitHub, Linux, Postman

PROFESSIONAL EXPERIENCE

Webnox Technologies Coimbatore, India
Software Engineer August 2025 – September 2026

TaxiBy — Enterprise Ride-Hailing & Fleet Mobility Platform NestJS, Next.js 16, Redis, Uber H3, WebSockets, PostgreSQL, Cashfree

- Architected high-concurrency NestJS microservices (core dispatch, tracking, notifications), managing real-time driver telemetry, dynamic surge pricing, and automated dispatch.
- Engineered sub-second driver dispatch using Uber’s H3 Hexagonal Spatial Index (Res 7) and Redis Sets, replacing expensive database polygonal queries with O(1) lookups (<2ms latency).
- Engineered real-time driver GPS telemetry streaming via WebSockets and Redis, implementing distance-threshold throttling and debouncing to eliminate redundant location pings and reduce network payload by ~75%.
- Slashed third-party Google Maps API overhead by 70–80% (saving ₹25k–₹35k/month) via coordinate-rounding Redis cache and built an immutable double-entry wallet ledger with automated Cashfree Payouts.

ProductCRM — Enterprise Multi-Tenant CRM & AI Copilot Platform NestJS, Next.js, Prisma, PostgreSQL, Docker, DeepSeek LLM, MCP

- Engineered an enterprise multi-tenant CRM currently powering internal company operations, architecting request-level data isolation via NestJS and Node.js AsyncLocalStorage for upcoming commercial SaaS rollout to external customers.
- Integrated an internal AI Copilot powered by DeepSeek LLM and a custom Model Context Protocol (MCP) tool execution framework, featuring RBAC-aware tool access and 2-phase human write confirmation safeguards.
- Built an idempotent multi-entity lead conversion and customer onboarding pipeline using atomic Prisma database transactions, guaranteeing zero duplicate company, contact, or opportunity records during onboarding.

Enterprise Multi-Tenant ERP Microservices (EFS) Go (Golang), Apache Kafka, gRPC, PostgreSQL, Redis, KrakenD, Docker

- Architected an enterprise multi-tenant ERP platform spanning 11 microservices in Go (Golang), Apache Kafka, gRPC, and PostgreSQL, processing work orders, procurement, and fleet dispatching across isolated tenant domains.
- Implemented the Transactional Outbox Pattern in Go with background workers and exponential backoff retry logic, eliminating dual-write failures and guaranteeing at-least-once delivery across 15+ Kafka domain topics.
- Engineered an in-memory GPS dispatch & route optimization engine in Go using the Haversine formula (<12ms latency) and designed a KrakenD API Gateway layer handling 8,000+ req/sec with sub-5ms proxy overhead.

Client Web Applications & Production Deliverables Next.js 16, React 19, Node.js, WebSockets, Tailwind CSS

- Delivered 10+ production web applications including custom CMS platforms, high-conversion e-commerce portals with secure payment checkouts (Razorpay, Cashfree), real-time analytics dashboards, and interactive 3D web experiences.
- Built responsive, SEO-optimized frontends in Next.js 16 and React 19 with Tailwind CSS, integrating WhatsApp messaging via Interakt, transactional SMS via Fast2SMS, and IVR telematics.

EDUCATION

B.E., Computer Science and Engineering — Sri Shakthi Institute of Engineering and Technology CGPA: 7.93 / 10 | Oct 2021 – Apr 2025

Higher Secondary Certificate (Class 12) — Sai Vidhya Nikethan Matric Higher Secondary School Percentage: 93% | Jun 2020 – Mar 2021

Secondary School Certificate (Class 10) — SRMV Swami Shivananda Higher Secondary School Percentage: 93.2% | May 2018 – May 2019
